

Choose from either Bose or Sony high- frequency headphones and the optional JBL On Tour Micro for bedside use

The Neuromonics Sanctuary is brought to you by the world leader in tinnitus treatment. With more than 15 years of research, Neuromonics, Inc. consistently delivers relief to tinnitus sufferers worldwide.

The Neuromonics Sanctuary works on the same principles as the Neuromonics Oasis, the gold standard for long-term reduction of tinnitus disturbance and awareness. Like the Oasis, Sanctuary is engineered to deliver on-demand relief while listening to calming, relaxing music.

**The Neuromonics® Sanctuary™**

**Relief when you want it.  
Relief when you need it.**

The Neuromonics Sanctuary uses customized music to interact with the sounds of your tinnitus, providing an on-demand sense of control and relief over your tinnitus.

**A Breakthrough for Tinnitus Patients**

**The Neuromonics® Sanctuary™**

Relief when you want it.  
Relief when you need it.

# Relaxing. Safe. Effective

## The Neuromonics® Sanctuary™

After successfully treating thousands of tinnitus patients, Neuromonics - the worldwide leader in tinnitus treatment - is bringing tinnitus sufferers a new option.

The Neuromonics Sanctuary relieves tinnitus symptoms by combining relaxing music with a customized neural stimulus. The Sanctuary blends a customized, high-frequency signal with music to cover the tinnitus and provide an immediate sense of control and relief for the tinnitus sufferer.

With the Sanctuary, it's easy to find relief. Tinnitus sufferers listen to customized, pre-programmed music designed to provide relief from their particular tinnitus symptoms.

The Sanctuary provides relief while listening to the device. When your tinnitus flares up, the Sanctuary is there to help. Whether you're reading the paper, falling off to sleep or working on the computer, the Neuromonics Sanctuary provides

relief when you want it  
and relief when you need it.

## The Neuromonics® Sanctuary™

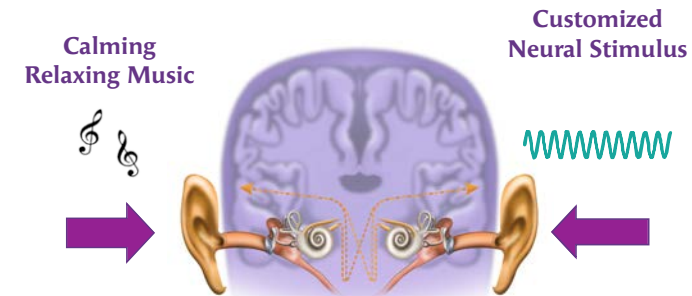

Each Sanctuary comes with a copy of the Neuromonics Tinnitus Management Handbook
